About Us

Guardian Wireless, Inc.

Guardian Wireless, Inc. develops wireless security systems to help prevent asset damage or loss. We took the role of protecting priceless property that people own. Guardian Wireless, Inc. is continuously developing unique alarms systems to meet the needs of today's world. We have developed ideas on how to improve our products for our customers by adding accessories to our security systems such as a siren/horn or by just changing and updating our web site. We strongly believe and practice first hand customer service. Here at Guardian Wireless, Inc. our customers are not numbers but relationships and names. With the convenience of our systems online activation, history logs, message sending combined with telephone notification we try to make security and life easy. Over the years, we have gained endless experience and expanding knowledge of security software and hardware. For additional information on our company please visit us online at www.guardianwireless.com.

Security System Features

- ✓ No land line is needed to receive phone calls.
- ✓ Wireless sensor technology avoiding sensor line disconnection.
- ✓ Archive your recorded history via Internet for up to 4 years.
- ✓ Send/Receive daily status messages.
- ✓ Retrieve GPS coordinates and status via Internet 24/7.
- ✓ Arm / Disarm units via Internet 24/7.
- ✓ Calls up to 3 phone numbers, 3 times with an automated event specific message.
- ✓ Securely, access contact, history and control panels via Internet.
- ✓ Customized security systems to fit your specific application.
- ✓ Flexible monthly service plans.

Guardian Wireless

Customization

We offer custom configuration with our products. If you need more or less sensors we are able to configure the pre-developed system for you at **no charge**. We meet the needs of our customers by offering special sensors and we are constantly seeking sensors that will fit endless applications. If you are looking for a car alarm system, we can custom configure one for you.

We also offer custom development to fit any application you might need at an **additional charge**. Contact us for additional information.

Warranties

Extended Limited Warranty

If you have purchased our Extended Limited Warranty, we will extend the Limited Warranty. The Extended Limited Warranty is available in One, Two or Three year increments. Extended Limited Warranty is available upon purchase of the unit or within the last thirty days of the initial warranty term.

RV Guardian®

Global Base Price:
\$1,295.00

GSM Base Price:
\$695.00

Protects and Guards Against
Intrusion
Smoke
Power
Fire

RV Guardian®

Protect your RV from theft. You paid good money for your RV. So make it extremely difficult for someone to steal it. RVs are very tempting to fugitives who want to skip the country and have a place to sleep, or even to people who want to sell your investment to make a profit. Spend a little on superior products that will protect your recreational vehicle. When you think about it, it's cheaper than replacing your entire RV altogether and it's well worth the peace of mind.

The RV security system, RV Guardian®, uses wireless sensors to detect unauthorized entry, smoke, high water levels, GPS, loss of power and low battery voltage. If an alarm is triggered you will receive an automated event specific phone call within 20-30 seconds, allowing you to take proper action.

Guardian Wireless

By logging online to your secure account you are able view the history, status and condition of your RV. RV Guardian® will notify you if your RV moves outside an invisible fence also known as geo fence

In storage applications, a user may want to monitor loss of power or temperatures. Commercial users may want to track GPS (Global Positional System). As your needs change RV Guardian® can be updated and upgraded to accommodate. If you decide to purchase a new RV, the RV Guardian® security system can be easily transferred to your new RV.

We offer two different types of security systems with different features. One type works off the cellular towers and the second type works off the Inmarsat Satellite system. For additional details please contact us.

RV Guardian® provides you with completely wireless security capabilities to activate electronic devices in the RV, while allowing you the expense and hassle of installing a hard wired security system. Get additional information today because tomorrow may be too late.

Marine Guardian®

Global Base Price:
\$1,295.00

GSM Base Price:
\$695.00

Protects and Guards Against:
Intrusion
Smoke
Power
Fire

Marine Guardian®

Anything can happen at anytime to your yacht. Unfortunately, you will not always be there to stop daily threats your boat faces before resulting in severe damage. That is why Guardian Wireless, Inc. developed Marine Guardian®. The boat security system, Marine Guardian®, will provide protection and notification against the most prevalent threats to your boat while at the same time giving vessel owners the ability to remotely activate and deactivate electronic devices on board.

The boat security system, Marine Guardian® uses wireless sensors to detect unauthorized entry, smoke, fire, high water levels, irregular bilge pump cycles, loss of shore power, low battery voltage and drifting. If a sensor is triggered, Marine Guardian® will call up to three phone numbers three times with an automated event specific message. You can then take the proper action.

Guardian Wireless

By logging onto our web site, you can view the history, status and condition of your boat. You are able to receive status, GPS, and arm/disarm your unit at anytime.

In charter applications, a user may want to monitor engine speeds or temperatures.

Commercial users may want to track fish hold temperatures and intrusion. If you purchase a new boat your Marine Guardian® security system can easily be transferred to the new boat. As your needs change Marine Guardian® can be updated and upgraded to accommodate. The simple removal of the wireless sensors and installation is made easy.

We offer two different types of security systems with different features. One type works with the cellular towers and the second type works off the Inmarsat Satellite system. Get additional information today because tomorrow may be too late.

Contractor Guardian™

Global Base Price:
\$1,295.00

GSM Base Price:
\$695.00

Avoid Property Loss
Intrusion
Smoke
Power

Contractor Guardian™

Contractors purchase endless amount of small to large equipment. Each piece of equipment helps get a job done. When fugitives take advantage of your unsupervised equipment, the job is more difficult to complete.

Guardian Wireless, Inc. can help make your job easier by monitoring your equipment for you. If you are undecided about investing in a jobsite security systems just think of this: it is less expensive and less time consuming to purchase a security system than replacing your tools.

Our Contractor Guardian™ is a wireless security system, preventing a thief from disabling your security system by cutting wires. Our security system sensors are equipped for outdoor applications. Contractor Guardian™ is easy to install and move from jobsite to jobsite.

Guardian Wireless

Contractor Guardian™ uses wireless sensors to detect unauthorized entry, smoke, high water levels, GPS, loss of power and low battery voltage. Contractor Guardian™ builds an invisible fence around a parked job trailer. Contractor Guardian™ allows you to always know where your job trailer is located by receiving GPS. If a unit receives an alarm the system will call up to three phone numbers with an automated message within 20-30 seconds. You can then take the necessary action.

By logging online to your secure account, you can view the status and condition of your jobsite. As your needs change your Contractor Guardian™ can be updated and upgraded to accommodate. If you relocate to new jobsite your Contractor Guardian™ security system can be easily relocated.

Tool Guardian™

Tool Guardian™

Anything can happen at anytime to your tool storage. Unfortunately, you will not always be there to stop the daily threats your tool storage faces before severe damage or loss occurs.

Tool Guardian™ Sensors

Intrusion

Monitors for unauthorized entries and movement. Alerts you of any illegal entry.

Power Loss

Monitors for loss of power. Alerts when power is lost.

At Guardian Wireless, Inc., we know that you cannot guard your tools at all times. Tool Guardian™ (Tool Theft) will protect and provide notification against the most prevalent threats to your tool storage. At the same time, it gives tool owners the ability to remotely activate and deactivate electronic devices on site.

The Tool Guardian™ will help secure your tools, preventing loss or damage by monitoring your tools wirelessly.

Tool Guardian™ builds a virtual fence around a parked tool storage, using wireless sensors to detect unauthorized entry, loss of power and low battery voltage. Tool Guardian™ takes some of the worry out of tool ownership.

The Guardian System™

The Guardian System™

There is never enough security for your life investments. The portable security alarm system, The Guardian System™, was created to help increase security in multiple situations.

It is a portable security system developed to monitor for three separate situations individually, depending on the circumstances. For instance, you can monitor water level in the basement during flood season.

Due to the design of the portable security system, you can easily relocate The Guardian System™ and monitor for air temperature on your yacht or RV. You can monitor any area with any sensor at any time individually. The Guardian System™ is the only hard wired system that Guardian Wireless offers.

Guardian System™ Sensors

Intrusion

Monitors for unauthorized entries. Alerts you of any illegal entry.

Temperature

Monitors ambient air temperature ranges. Alerts you when the temperature is above 110°F or below 38°F.

Water Level

Monitors water level. If water level exceeds the float switch.

Grandma Guardian™

Grandma Guardian™

The Grandma Guardian™ is the perfect gift for your loved ones or yourself. Make sure you and your loved ones are safe! If you are getting the Grandma Guardian™ for a loved one, be notified when they need assistance! If it's for yourself, notify someone else immediately when you need help! Wear the panic pendant transmitter like a necklace and push the panic button when help is needed!

This is especially useful for situations where you or your loved one is unable to reach a phone to call for help when something happens, such as a nasty fall. It's light, and much more convenient than carrying a cell-phone around.

Guardian Wireless

Trucker Guardian™

Trucker Guardian™

Trucker Guardian™ is a wireless fleet management & tracking system that will make your life easy and increase your savings.

Save time and money with our Trucker Guardian™! Trucker Guardian™ allows you to not only track your trucks, but also communicate with them and manage them online!

Here are some basic features our system will provide:

- Manage your fleets: Log on to your secure account and manage your fleets, trucks, and drivers.
- Track your trucks: View them on a map, obtain load information, and more.
- Communicate with drivers: Send & receive messages with our Trucker Communicator™.

Additional Sensors

Most of our sensors are wire-free which means less. Less installation cost, less installation damage from drilling holes and pulling wires, less time spend on premises for the installer, and less compromise to security due to the inflexibility of sensor location when using hardwire sensors. In the following pages are the sensors we offer with our security systems. If you do not see a sensor that will work for your application please contact us and we will conduct extensive research to meet your application needs.

Smoke Sensor

Whether you are home or away, monitored smoke sensors are always heard. There is no better way to protect your loved ones and possessions from the ravages of fire.

Price: \$113.33

Price: \$39.13

Horn/Siren/Speaker

The horn is a high power (13 Vdc) two-channel self-contained electronic siren driver/speaker combination. The horn is ideal for inside or outside installation. The horn has an option of yelp or steady sound option when an alarm is received. When a sensor is triggered the horn will yelp/steady for a normal 30 seconds. You can specify how long the horn sounds upon ordering.

Page 16

Guardian Wireless

Price: \$139.93

35' X 40' PIR (Passive-Infrared Sensor)

The Passive-Infrared Sensor detects movement within a specific area by sensing the infrared energy emitted from a body as it moves across the sensor's field of view, causing temperature change in the sensor's zones. Use the motion sensor to protect locations where door/window sensors are impractical or not needed. Motion sensors also provide backup protection for door/window sensors. This sensor is indoor / outdoor but needs to be protected from nature. A masking kit is provided to block portions of coverage area. There is a three minute transmitter lockout time after an alarm that helps extend battery life.

50' PIR (Passive-Infrared Sensor)

A motion sensor (passive-infrared or PIR) detects movement by sensing the infrared energy emitted from a body as it moves across its field of view. When this motion is detected, the sensor transmits an alarm signal. Install motion sensors to protect areas where door/windows sensors are impractical or not needed. For example, use a motion sensor to protect large areas or open floor plans. Motion sensors can also provide backup protection in areas where door/window sensors exist.

Price: \$139.93

Price: \$82.53

High Water Sensor

The High Water sensor spares you the headaches of water leaks that go undetected for hours and even days. The unit will call you when the environmental alarm detects water.

To Order Call: (800) 330-7413

Price: \$81.13

Heat Detector

The Heat Detector senses danger in areas where high heat may normally occur, such as kitchens or attics. The Heat Detector works by sensing rapid temperature changes and extreme heat. When heat rises to 135 degrees F your unit will call you with an alarm.

Key Fob / Keychain Touchpad

The Keychain Touchpad is an alkaline battery-powered, wireless touchpad designed to fit on a keychain, in a pocket or purse. It provides owners a convenient option for arming/disarming the system locally.

Price:
2 button—\$62.93
4 button—\$69.93

Price: \$120.33

Glass Break Sensor

The Glass Break Sensor listens across the glass break frequency spectrum for greater false alarm immunity. This allows the sensor to detect breaking glass through blinds and light, unlined drapes. It is the ideal application where hard wired acoustic sensors are impractical. A 20' (foot) radius and 360 degree coverage can protect an entire room with one sensor. The Glass Break Sensor recognized the actual pattern of glass breaking across the full audio band. It can be mounted on the ceiling, or on the opposite wall, or on adjoining walls.

Guardian Wireless

Door / Window Sensor

The Door / Window Sensor can be easily installed that provide the highest level of intruder protection available for a home or business. These sensors monitor doors, windows, cabinets, or anything that opens and closes. When the door / window sensor is 'opened' you will receive a phone call.

Price: \$67.13

Low Temperature Sensor

The Low Temperature Sensor detects furnace failure in residential or commercial sites by sensing when the air temperature falls below 45 degree F. The Low Temperature Sensor is used in climates where temperatures can drop below 32 degree F. The Low Temperature Sensor monitors an open area up to 900 sq feet. When low temperature is sensed the sensor will send a signal to the control box.

Price: \$78.33

Shock Sensor

The Shock Sensor detects the vibrations made by an intruder trying to break a window or door. It also detects a window or door opening and tamper situations such as an intruder removing the sensor cover. Vibrations cause momentary open circuit in the shock element of the sensor. The circuit closes again when the vibration stops. The sensor "sees" the open/close action as a pulse, causing the sensor to transmit an alarm signal.
