Tool Guardian™

Monitors Against Toolbox
Movement
Intrusion

Imagine working on a project and having all the tools and parts you need right there. That is what you strive for when you are storing and organizing your tools. Your tool storage equipment should provide you with these three important elements: Security from theft, loss and damage.

Unfortunately, that is the perfect dream for a thief. Consider your tool box locked and on wheels. Not only is it convenient for you but also for a thief.

What Is It?

Guardian Systems, LLC. knows that people want to monitor investments. That is why Guardian Wireless, Inc. invented Tool Guardian™. Tool Guardian™ monitors for theft and movement plus loss of power. We use advanced technology to monitor for theft of your tools.

Features

Once installed you simply log onto our secure website and insert what phone numbers you want Tool Guardian™ to call. You have the freedom of changing numbers at anytime. If a sensor is triggered you will receive an event specific automated message. You can take the proper action and avoid damage or loss. Our website, www.guardianwireless.com can assist you with everything from initial setup to ongoing support and new product information
